EDUCATION

Texas A&M University

Bachelor of Science in Computer Science, Minor in Cybersecurity

College Station, TX

May, 2028

Relevant Coursework: Linear Algebra, Engineering Computation Lab (Python), Program Design and Concepts (C++), Experimental Physics and Engineering Lab II - Mechanics, Discrete Structures for Computing, Data Structures and Algorithms, Computer Organization, Computer Systems, Foundations of Software Engineering, Cybersecurity Risk

University Involvement: Engineering Mentorship Council, Aggie Women in Computer Science, TAMU Sahithya Competitor & Competition Chair, TamuHack Participant

EXPERIENCE

AI and Software Development Intern

True Rise Foundation

July 2026 – Present

College Station, TX

- Develop AI-assisted software applications using modern programming practices and prompt engineering techniques, while implementing secure coding practices.
- Design and evaluate AI prompts to improve application functionality, automation, and developer productivity.
- Collaborate with mentors using Git and GitHub for version control, code reviews, and team-based software development workflows.

Student Worker I - Program Coordination - Applied Cybersecurity

Texas A&M Engineering Extension Services (TEEX)

July 2026 – Present

College Station, TX

- Perform administrative support functions including records management, document organization, scheduling, and office coordination in a fast-paced environment.
- Assist with cybersecurity program operations by organizing training records, monitoring participant information, and supporting day-to-day program coordination.
- Troubleshoot basic IT and software issues, provided technical assistance to users, and documented support requests while maintaining data confidentiality.

Student Technician

Energy Systems Lab (TEES)

August 2025 – July 2026

College Station, TX

- Maintain and update websites for the Energy Systems Lab and Texas Energy Summit, ensuring accurate content management and accessibility compliance
- Organize and manage technical documentation, including research publications, conference papers, and laboratory records using structured management practices
- Provide technical support and troubleshoot software, hardware, and web-related issues for faculty and departmental operations

PROJECTS

TamuHack American Airlines Challenge

Texas A&M University

January 2026

College Station, TX

- Developed SmartCabin, a React-based passenger service platform enabling real-time in-flight requests for meals, beverages, accessibility assistance, accessories, and cabin services.
- Built an intuitive user interface using reusable React components, focusing on usability, accessibility, and responsive design to simulate real-world airline passenger interactions

Python Word Scramble Game

Texas A&M University

January 2025

College Station, TX

- Designed and implemented an interactive Python word-scramble game utilizing randomized algorithms, string manipulation, and user-driven input processing.
- Applied core software engineering principles by incorporating control flow structures, modular function design, and dictionary-based data storage for efficient game logic management

TECHNICAL SKILLS

Languages: Java, Python, C++, SQL, HTML/CSS, R, Haskell, TypeScript, Bash/Shell Scripting

Frontend & Frameworks: React, Node.js, WordPress, SquareSpace

Developer Tools: Git, GitHub, Visual Studio Code, Google Cloud Platform, RStudio, Slack, GitHub Actions (CI/CD)

Libraries: NumPy, Matplotlib, Pandas

Concepts: Object-Oriented Programming, Data Structures & Algorithms, Software Development Lifecycle, Debugging & Testing, Version Control, Computer Organization & Systems, System Design

Operating Systems: Linux, Windows, macOS
